Smart Plant Grow Light

Product Features

- 1. The smart plant grow light is equipped with 80 high-power LED nodes:
 - 20 warm LED nodes (3000K full spectrum) simulate natural light and are suitable for plants at all growth stages.
 - 24 blue LED nodes (400–460nm) assist photosynthesis, green leaf growth, protein synthesis and fruit formation.
 - 36 red LED nodes (630–660nm) promote root growth, blossoms, fruiting and prolong the flowering period.
- 2. Auto Mode: Provides excellent proportional lighting for plants at various phases of development. With a click of a button provide all your plants with adequate lighting.
- 3. DIY Mode: You can adjust the lighting, distribution and brightness of red, blue and full-spectrum according to the needs of your plants. Please refer to the table below for suggestions on how to properly adjust your light for various plant growth stages.
- 4. Schedule The grow light will turn on/off automatically depending on the time set. No need to reset daily.
- 5. Zone Control: There are two areas (A & B) that can be controlled independently for separate lighting modes and timing controls.
- 6. App Control: You can control the grow light via APP as long as your light is within 10 meters or 30 feet from your control device.

RB 6:1 Foliage Growth	RB 9:1 Bloom	RB 7:1 Flower Growth	RB 8:1 Fruit Growth
RB 5:1 Succulent Growth	RB 1:4 Succulent Coloring	RB 9:1 Fruiting	RB 3:1 Seedling

Troubleshooting

(1) Automatic Bluetooth Search Failed

- ① Make sure your Bluetooth is turned on:Navigate to Settings > Bluetooth > Turn it on
- ② Make sure the app is allowed to access Bluetooth:

If you are using an Apple device:

Navigate to Settings > Find Smart Life App > Bluetooth > Turn it on

If you use an Android device:

Navigate to Settings > Apps > Find Smart Life App > Permissions > Bluetooth > Turn it on

(2) Bluetooth Connection Failed after Device Search Succeeded

- ① Make sure the socket of the grow light is secure and powered on.
- ② Make sure the distance between your phone and the grow light is less than 30 feet or 10 meters.
- ③ Make sure your WIFI network is working and connects to your phone properly.
